Subject: [Socbin] Ph.D. positions in Molecular and Cellular Life Sciences
To: socbin@socbin.org

Hi,

A number of Ph.D. positions are available in Molecular and Cellular Life Sciences at University of Wyoming (see www.uwyo.edu/mcls for more information, including a list of participating research groups). A Ph.D. in MCLS at University of Wyoming typically takes about 5 years, but can be faster for students who already have M.Sc. degrees. All positions come with a guaranteed Ph.D. student stipend, which will support your living costs in Wyoming. Laramie is 2 hours from Denver, Colorado in the Rocky Mountains.

Candidates with expertise in bioinformatics or computational biology are desired, but all candidates must have formal training in one of the life sciences or in chemistry to be considered. There is no application fee when applying. To be considered, please send your CV and a statement of research/career interests to Ahrenhol@uwyo.edu. Please also arrange to have official university transcripts and three letters of recommendation sent by email or post to Vicki Ahrenholtz (Ahrenhol@uwyo.edu). If you already have an M.Sc. degree, GRE scores are not required.

If you have questions about this process, please email me at liberles@uwyo.edu. I hope you will be interested in joining us at University of Wyoming.
