Examensarbete eller doktorera i England?

Här erbjuds två projekt på ett universitet i England; Cranfield University. Vi har sedan ht07 ett samarbetsavtal med Cranfield som innebär att vi har ett utbyte av studenter på master-nivå. Projekten som erbjuds här är ett examensarbete och ett annat ett doktorandprojekt. Information:

Two fully funded research studentship positions are available within my group for immediate start (1 PhD studentship and 1 MSc(Res)). Both studentships are centred on chemometric analysis or food and are only applicable to EU citizens. Prospective students are free to contact me directly via email.
