Bioinformatic Internship

Life Technology in Stockholm have a possible summer intern program in bioinformatics project on Next Generation Sequencing data. The period is about 3 months (between May and Sept). Contact Margareta Krabbe (margareta.krabbe@ibg.uu.se) if you are interested. Please respond quickly as the application deadline is close.

I thank all of you that have sent letters of interest to me. The responsible at the company has let me know that the company will decide in April whether this internship will be given resources or not. I will place new information on this site as soon as I get the information. /Margareta Krabbe IBG

Företag/institution: Life Tecnology
Plats: Stockholm
Projektstart: May 2011
