Hi! I am looking for a field assistant to work with us for three months from June 1 to August 31 on projects on vegetation and ecosystem ecology. This work will involve studies on lake islands in the Arjeplog region, some work on the effects of fire history on ecosystem processes both near Arvidsjaur and near Umeå, and other field and lab work as required. It would be well suited for any student interested in first-hand experience in field ecology. If interested then please contact me on 'david.wardle@slu.se', or if you know someone who might be interested then please pass it onto them. Thanks!

David A. Wardle
