

Your are invited to participate in the course on

Advanced Electron Microscopy (5p)
(Avancerad elektronmikroskopi)

that will start on Monday, February 24th (week 9).

The course will give a general introduction to scanning and transmission electron microscopy. The course will give an introduction in the field as well as lectures dedicated to special electron microscopy and focused ion beam techniques. Lecturers from the Ångström laboratory, the Biomedical Centre, the Swedish University of Agricultural Science, the Evolutionary Biology Centre, the Geocentrum will contribute to this course. The lectures will be given in the morning and the laboratory sessions in the afternoon.

Evaluation: assignments and oral exam.

Dates: Week 9 (24-28 Feb.) 2014
 Week 11 (10-14 March) 2014

You're all WELCOME!

Registration:

Klaus Leifer (klaus.leifer@angstrom.uu.se) (for course registration)

We would appreciate if you could register latest 14th February. There is a limited number of places available.

For more information on this course, you are welcome to contact me on tel. 0736827423 or email stefan.gunnarsson@ebc.uu.se

Welcome!
