

*AMINOTECH AS is a Norwegian company which has developed a unique technology for production of natural amino acids based on bi-products from the fish industry. The company has a new production facility at Lesja in Norway and administrative offices in Oslo. The new factory will shortly move from a development- and plant completion phase to production ramp-up and continuous operations. In connection with this the implementation of an expansion of the organization within key areas is taking place.*

- **PROCESS TECHNOLOGY & PRODUCTION DEVELOPMENT**
- **BIOTECHNOLOGICAL PROCESSES (ENZYMATIC HYDROLYSIS)**
- **KEY ACCOUNT MANAGER/SALES – NUTRITIONAL SUPPLEMENTS & FOOD INGREDIENTS (NUTRACEUTICALS)**

Key tasks and challenges with regard to the three positions will be:

Process technology:

- Project responsibility in connection with start-up of critical process equipment; trouble-shooting during start-up; optimization of process conditions and production equipment; implementation of back-up-solutions
- Develop know-how about the process for further development of existing production as well as project design and implementation of new production lines, and facilities for manufacturing/upgrading of enzymes and bi-products

Biotechnological processes:

- Improve/quality assure the biotechnological processes of the production (with focus on product, reaction rate, yield, etc.); introduce new biotechnological solutions, evaluate alternative raw materials; develop system for production of enzymes
- Development of existing as well as new product groups (amino acids, peptides, enzymes, etc.)

Key account manager:

- Drive technically & commercially focused sales within the company's first markets (food ingredients, nutritional supplements, a.o.) with goal to achieve highest possible product value
- key account manager for large international customers

We are looking for candidates who have relevant work experience from production/development/sales within biotechnology, pharmaceutical products, food production or similar industries. Experience within proteolytic hydrolysis, fermentation, or similar disciplines will be a significant advantage. Good English language skills will be required (spoken and written); knowledge of other languages (in particular Russian) will be an advantage. Applicants must be willing to take on challenging assignments in a company which will rapidly be expanding its activities.

For all positions we are looking for candidates with high formal education within their field (master degree, PhD or similar). As all the positions are new in the company, it will be possible to shape tasks and level of responsibility in accordance to individual experience, qualifications and preference. As the company grows new opportunities for other assignments and other work locations can open up. The organization is set to expand considerably within the three disciplines in the next years.

The work location can be Oslo or Lesja where Aminotech has its production facility in a beautiful mountain setting close to the Dovrefjell National Park. Initially, however, it will be necessary (for the technical positions) to work at Lesja for longer periods. We encourage qualified candidates outside Norway to apply.

*We offer a competitive remuneration. If you have questions about the positions, please contact our CEO William B. Gram, telephone +47 4642 7000. Applications with CV can be sent per email to: [william.gram@aminotech.no](mailto:william.gram@aminotech.no).*
