

## Sommarjobb på Accenture

Vi fick en jobbbanners från en alumn från Molekylär bioteknik:

Summer Internship Accenture 2008 Are you a third or forth-year student?

Accenture are now repeating the success of 2007 summer internship! Lasting from June to August (minimum 6 weeks during this period), the summer internship starts with an induction that will give you a solid grounding in business and technology consultancy, as well as valuable commercial skills. Then you'll embark on a project which could be based anywhere in our business. Rather than just shadowing someone, you'll be a fully-fledged member of the team right from the start, with responsibilities that could involve testing software, conducting research, writing reports or analysing data.

Accenture is involved in business consulting, process design work and the application of technologies to business. A career in Accenture is varied and stimulating because each project presents a new challenge and will give you exposure to new clients, business issues, technologies and people. We need people who are able to challenge conventional thought, offer unique perspectives and conceive more innovative solutions for our clients.

Apply online at [www.accenture.se/jobb](http://www.accenture.se/jobb). The last day to apply is the 31st January.

**Företag/institution:** Accenture  
**Plats:** Stockholm  
**Projektstart:** Sommaren 2008
