

Field/lab assistance needed

Temporary field/lab assistance needed in the Laurila/Räsänen frog groups

We are looking for temporary assistance during our upcoming field season (1-2 weeks end of March-mid April and a couple of periods during the summer). Our work focuses on acid stress tolerance and adaptive maternal effects of *Rana arvalis* (moor frog) and *Rana temporaria* (grass frog), and field surveys of amphibian breeding sites. Temporary assistance is needed for both lab and field work (e.g. jelly manipulation experiments in the lab and sample collections in the field). The exact times depend on the progress of the frog breeding season.

Interested? Contact Katja Räsänen katja.rasanen@eawag.ch or anssi.laurila@ebc.uu.se (018-4716493)
