

## Examensarbete i Johan Elfs grupp

Masters thesis project at the interface between biology, physics and computer science. The Elf Lab at Dept. Cell and Molecular Biology (<http://www.icm.uu.se/molbio/elflab/>) are looking for a student interested in a career in academic research for a master thesis project. The project involves development and implementation of a new algorithm for combined stochastic and deterministic simulation of reaction diffusion kinetics. The project is hard and will require significant skills in numerical methods, programming (C++) and chemical kinetics.

**Företag/institution:** ICM/BMC

**Plats:** Uppsala
