

# Development of peptide/protein assays for stabilized plasma

Denator AB is a young technique focused company that produces and sells products for sample stabilization, standardization and processing. The company started at Uppsala University/Chalmers in 2005 and today have 10 employees. Headquarter in Göteborg and a research facility in Uppsala Science Park.

We are looking for two highly motivated persons that would like to perform 20-30 weeks of degree project at Denator. We have two different research projects focused on blood separation or plasma protein/peptide sample analysis. Both projects require good laboratory and analytical skills, the ability to work independently and an interest in problem solving.

**Company: Denator AB**

**Project start: As soon as possible**

**Location: Uppsala Science Park**

**If you are interested, please send an e-mail to [karl@denator.com](mailto:karl@denator.com)**
