Author Hoda Ibrahim		
Title (English) Evaluation and development of bioinformatics tools for design of ligation-based probes for nucleic acid analysis		
Title (Swedish)		
Abstract <p>The aim of this thesis is to develop a process for the selection of a target for the identification of microorganisms using the so-called padlock probes, and to design and implement a computer program that automates this process.</p>		
Keywords <p>Padlock probes, probe design, rolling circle amplification (RCA), AMSD, YODA, OligoArray 2.1</p>
