Title (English) Estimate of microbial biodiversity in <i>Electra pilosa</i> and <i>Alcyonium digitatum</i>		
Abstract <p>In attempting to characterize the microbial population of the marine species <i>Electra pilosa</i> and <i>Alcyonium digitatum</i> this study yielded a wide range of microbial growth using <i>in vivo</i> cultivation techniques on agar plates and PCR. The methods of the study were evaluated to the benefit of coming studies.</p>		
Keywords <p><i>Electra pilosa</i>, <i>Alcyonium digitatum</i>, PCR, agar cultivation, marine organisms</p>
